Course Name : PERSONALITY DEVELOPMENT

Co-ordinator Name : Suradkar D.E. **Duration : 35 Hrs.**

Objectives :

Personal development goals are objectives you set to **improve your character, skills and capabilities.** Setting these goals involves assessing yourself and identifying the areas in which you can improve to maximize your potential. To get started with personal development, you should create a plan with actionable steps.

Syllabus Content :

UNIT I INTRODUCTION TO PERSONALITY DEVELOPMENT (7)

The concept personality- Dimensions of theories of Freud & Erickson- personality significant ofpersonality development. The concept of success and failure: What is success? - Hurdles in achievingsuccess - Overcoming *hurdles* - Factors responsible for success What is failure - Causes of failure. SWOTanalyses.

UNIT II ATTITUDE & MOTIVATION (10)

Attitude - Concept - Significance - Factors affecting attitudes - Positive attitude - Advantages –Negativeattitude - Disadvantages - Ways to develop positive attitude - Difference between personalities havingpositive and negative attitude. Concept of motivation - Significance - Internal and external motives -Importance of self-motivation- Factors leading to de-motivation

UNIT III SELF MANAGEMENT (10)

Understanding of life story- Focusing on Internal narratives- Managing change, confusion and uncertainty-Sharpening the Intellect-Schooling the mind- Socializing the individual

Unit IV: ACADEMIC COPING STRATEGIES (8)

Memory- Art of listening- Note making-Seminar presentation- Art of learning and writing guidelines- How to study.

Course Name : Guidance for UPSC & MPSC

Co-ordinator Name : Najardhane N.D. **Duration : 35 Hrs.**

Course Outcomes :

Student seeking admission for B.A. program is expected to imbue with following quality which help them in their future life to achieve the expected goals.

1) Realization of human values.
2) Sense of social service.
3) Responsible and dutiful citizen.
4) Critical temper
5) Creative ability.

Unit I : Fundamental Information of Competitive Exam, Nature, scope & objective.

Unit II : Types of Competitive Exam, UPSC, MPSC, SSC, RRB, LIC, and BANK PO.

Unit III : Introduction of UPSC & MPSC, Nature of UPSC & MPSC. Introduction of GS-I & GS-II (CSAT) paper. Selection Process, Information of Syllabus & Question paper, Steps of Exam Preliminary Exam, Main Exam & Interview Process.

Unit IV : Information about Books Special (State Board & NCERT, INDIA YEAR BOOK) Various types of News Paper& Magazine.

SAGAR BCA COLLEGE DEVMURTI TQ.DIST.JALNA

Add on Certificate Course

Department Of Management Science

Course Name : Programming Fundamentals

Co-ordinator Name : Prof. K.K. Solanke **Duration : 30 Hrs.**

About this Course :

Programming is an increasingly important skill, whether you aspire to a career in software development, or in other fields. This course is the first in the specialization Introduction to Programming in C, but its lessons extend to any language you might want to learn. This is because programming is fundamentally about figuring out how to solve a class of problems and writing the algorithm, a clear set of steps to solve any problem in its class. This course will introduce you to a powerful problem-solving process—the Seven Steps—which you can use to solve any programming problem. In this course, you will learn how to develop an algorithm, then progress to reading code and understanding how programming concepts relate to algorithms.

Syllabus- What you will Learn from this course

WEEK 1

Introduction - This module *introduces* a powerful process for solving any programming problem—the Seven Steps. You will learn how to approach a programming problem methodically, so you can formulate an algorithm that is specific and correct. You will work through examples with sequences of numbers and graphical patterns to develop the skill of algorithm development.

Lectures : Why you should learn to programs, Stepping through an algorithm, Testing an algorithm for a Numerical Sequence, A Pattern Squares, Testing a Pattern of Squares, Drawing a Rectangle,

Closest Point, Generalizing Closets Point,

Reading :

Programming: Plan First, Then Code Overview of the Seven Steps Algorithms
Step 1: Work an Example Yourself
Step 2: Write Down What You Just Did
Step 3. Generalize Your Steps
Step 4: Test Your Algorithm
A Pattern of Squares
Next Steps

Practice Exercises : Steps, Algorithm Practice, Algorithms

WEEK 2

Reading Code - In this module, you will learn to read code this means you will be able to execute a piece of code by hand, and clearly illustrate what each statement does and what the state of the program is. Understanding how to read code is the only way to be sure you can write correct code. By the end of this module, you will be able to read and understand code with functions, conditional statements, iteration, and other fundamental techniques.

Lectures : Why You Should Learn to Read Code, Declaring and Assigning a Variable, Examples of Expressions, Using Functions for Abstraction, Execution of Function Calls, Printing Example, Execution of If/Else, Execution of Switch/Case, While Loops, Equivalent For and While Loops, Execution of Nested Loops, Execution of Continue

SAGAR BCA COLLEGE DEVMURTI, TQ.DIST.

Add on Certificate Course

Department Of Management Science

Course Name : Programming Fundamentals

Co-ordinator Name : Prof. K.K. Solanke **Duration : 30 Hrs.**

Reading :
Declaring a Variable, Assigning a Variable, Expressions with Common Operators, Anatomy of a Function, How to Evaluate a Function, Scope, Printing, Conditional Statements, If/Else, Switch/Case, Shorthand, Loops for Repetition, While Loops, Do/While Loops, For Loops, Continue and Break, Higher-level Meaning

Practice exercises :
Variables and Expressions, Functions, Printing, Logical Operators, Conditional Statements, While Loops, Loops, Reading Code

WEEK 3 :
Types-Everything is a number to a computer, but types determine the size and interpretation of numbers. In this module you will learn about types beyond integers, both their conceptual representations, and their hardware representations in binary. You will learn basic data types, "non-number" types, and complex, custom types, as well as some important caveats, so you will avoid type-related programming mistakes

Lectures : Introduction to Types, Types and Formatted Output, Type Conversion, Everything Is a Number, Struct for a Rectangle, Uses of Typedef, Enumerated Types, A Duke Software Engineering Student on the Importance of Planning

18 readings : Converting between Decimal and Binary, Looking under the Hood, Basic Data Types, char, int float and double, Printing redux, Expressions Have Types, Type Conversion, Casting, Overflow and Underflow, "Non-numbers", Strings, Images, Sound and Video, Structs, Typedef, Enumerated Types

Practice exercises : Decimal, Hex, and Binary, Basic Data Types, Expressions Have Types, "Non-numbers", Complex, Custom Data Types, Types

WEEK 4 : Project -You have learned a lot about designing algorithms and the programming concepts that will help you implement them. For this project, you will develop and test your own algorithm for sorting data. This module will reinforce the importance of being specific when you write an algorithm and provide an opportunity for you to do so yourself, for a very common computational task: sorting.
Importance of Writing a Specific Algorithm
Introduction to Sorting

Reading : Sample PB&J Algorithm with Feedback

Practice exercise : Writing a Sorting Algorithm

Add on Certificate Course

Department Of Management Science

Course Name : Certificate Course in Event Management

Co-ordinator Name : Namrata Deshmukh **Duration : 30 Hrs.**

Course Description :

The purpose of this course is to enable the students to acquire a general knowledge about the "event management" and to become familiar with management techniques and strategies required for successful planning, promotion, implementation and evaluation of special events with a special focus on case studies of the events.

Expected Student Outcomes :

1. To acquire an understanding of the role and purpose(s) of special events in the organizations.
2. To acquire an understanding of the techniques and strategies required to plan successful special events.
3. To acquire the knowledge and competencies required to promote, implement and conduct special events.
4. To acquire the knowledge and competencies required to assess the quality and success of special events.

About classroom participation :

While the grade cannot be based on attendance *per se*, students should plan to be in class and ready to discuss the readings/ lectures. Students will be divided into small discussion groups at the beginning of the term, and topics for presentation will be assigned to each of group members.

CLASS SCHEDULE

Lecture 1: Principles of project/Event Management. From concept to reality (5)
Understanding project management - resources - activities - risk management - delegation - project selection - role of the Event Manager.

Lecture 2: Preparing a proposal (5)
Conducting market research - establishing viability - capacities - costs and facilities - plans - timescales - contracts.
Clarity - analysis - estimating attendance - media coverage - advertising - budget - special considerations - evaluating success.

Lecture 3: Crisis Management plan (5)
Crisis planning - prevention - preparation - provision - action phase - handling negative publicity - structuring the plan.

Lecture 4: Seeking sponsors (5)
Different types of sponsorship - definition - objectives - target market - budget - strategic development - implementation - evaluation.

Lecture 5: Organizing the event (5)
Purpose - venue - timing - guest list - invitations - food & drink - room dressing - equipment - guest of honor - speakers - media - photographers - podium - exhibition.

Lecture 6: Marketing tools
Types of advertising - merchandising - give a ways - competitions - promotions - website and text messaging.

Lecture 7: Media tools
Media invitations - photo-calls - press releases - TV opportunities - radio interviews. (5)

Lecture 8: Promotional tools
Flyers - posters - invitations - website - newsletters - e zone - blogs - tweets. (5)

5. While listening, when we assess what the speaker is speaking, it is,

A. comprehensive listening

C. systematic listening

D. critical listening

B. dialogic listening

6. Identify the polite method of beginning a business letter

A. We are forced to refuse

C. We find it difficult to believe

B. We demand to know from you

D. We appreciate your prompt reply

7. Pick the pronoun from the sentence; 'She was quite good looking'

A. She

C. Quite

B. Was

D. Good looking

8.The subject in the job application is written

A. before the salutation

C. before the complimentary close

B. after the salutation.

D. after the complimentary close

9. should be provided in a resume only on request

A. Telephone number

C. Educational qualification

B. Reference

D. Work experience

10. is a document that can be used as an evident in legal cases.

A. Notice

C. Agenda

Scanned with OKEN Scanner

B. Minutes of a meeting D. Memo

11. Identify the type of sentence: The boy climbed up to the top of the tower.

A. Simple C. Complex

B. Compound D. Superlative

12. involves processing and reconstructing the data, but_____ is letting the sounds beat your eardrums.

A. Listening, hearing B. Hearing, listening

C. Casual listening, focused listening D. None of the above

13. The and is also helpful for the listener to understand the meaning.

A. Tone, behavior C. Tone, attitude

D. Tone, intensity B. Pitch, tone

14. Using lecturers, handouts we acquire information from acquire information through.

A. Tutors, fellow learners C. Students, tutors

B. Other sources, tutors D. None of the above

15. The general categories of communications are -

A. Speech, writing C. Electronic communication

B. Printing D. All of the above

Proposal for organizing

A Certificate course in Career Guidance for UPSC & MPSC Examination

To,

The Principal
Sagar BCA College Devmurti, Jalna

Respected Sir,

Department of Commerce & Management is planning to organize a certificate course in **Career Guidance for UPSC & MPSC Examination.** This course will be organized for Under Graduate & Post Graduate students. The intake capacity is 40 students for this course. The duration of the course will be about 35 hours. This course will be held during August 2022 The copy of the syllabus is attached with this proposal for your reference. The staff members of the department will work as faculty for this course. **Asst. Prof. Najardhane N.D** is appointed as a course coordinator for this course.

Thanking You.

Programming Fundamentals

Duration 30 Hours

Language English

Co-ordinator Name: Asst. Prof. K.K. Solanke
Sagar BCA College Devmurti, Jalna

About thisCourse

Programming is an increasingly important skill, whether you aspire to a career in software development, or in other fields. This course is the first in the specialization Introduction to Programming in C, but its lessons extend to any language you might want to learn. This is because programming is fundamentally about figuring out how to solve a class of problems and writing the algorithm, a clear set of steps to solve any problem in its class. This course will introduce you to a powerful problem-solving process—the Seven Steps—which you can use to solve any programming problem. In this course, you will learn how to develop an algorithm, then progress to reading code and understanding how programming concepts relate to algorithms.

Syllabus- What you will Learn from this course

WEEK 1

Introduction - This module introduces a powerful process for solving any programming problem—the Seven Steps. You will learn how to approach a programming problem methodically, so you can formulate an algorithm that is specific and correct. You will work through examples with sequences of numbers and graphical patterns to develop the skill of algorithm development.

Lectures

Why you should learn to programs,
Stepping through an algorithm,
Testing an algorithm for a Numerical Sequence,
A Pattern Squares,
Testing a Pattern of Squares,
Drawing a Rectangle,

Generalizing Closets Point.

Reading

Programming: Plan First, Then Code
Overview of the Seven Steps
Algorithms
Step 1: Work an Example Yourself
Step 2: Write Down What You Just Did
Step 3: Generalize Your Steps
Step 4: Test Your Algorithm
A Pattern of Squares
Next Steps

Practice Exercises

Steps
Algorithm Practice
Algorithms

WEEK 2

Reading Code - In this module, you will learn to read code this means you will be able to execute a piece of code by hand, and clearly illustrate what each statement does and what the state of the program is. Understanding how to read code is the only way to be sure you can write correct code. By the end of this module, you will be able to read and understand code with functions, conditional statements, iteration, and other fundamental techniques.

Lectures

Why You Should Learn to Read Code
Declaring and Assigning a Variable
Examples of Expressions
Using Functions for Abstraction
Execution of Function Calls
Printing Example
Execution of If/Else
Execution of Switch/Case

Anatomy of a Function
How to Evaluate a Function
Scope
Printing
Conditional Statements
If/Else
Switch/Case
Shorthand
Loops for Repetition
While Loops
Do/While Loops
For Loops
Continue and Break
Higher-level Meaning

Practice exercises

Variables and Expressions
Functions
Printing
Logical Operators
Conditional Statements
While Loops
Loops
Reading Code

WEEK 3

Types-Everything is a number to a computer, but types determine the size and interpretation of numbers. In this module you will learn about types beyond integers, both their conceptual representations, and their hardware representations in binary. You will learn basic data types, "non-number" types, and complex, custom types, as well as some important caveats, so you will avoid type-related programming mistakes.

PRINCIPAL
Sagar BCA College
Devmurti, Tq. Dist. Jalna

Scanned with OKEN Scanner

WEEK 4

Project -You have learned a lot about designing algorithms and the programming concepts that will help you implement them. For this project, you will develop and test your own algorithm for sorting data. This module will reinforce the importance of being specific when you write an algorithm and provide an opportunity for you to do so yourself, for a very common computational task: sorting.

Importance of Writing a Specific Algorithm
Introduction to Sorting

Reading
Sample PB&J Algorithm with Feedback

Practice exercise
Writing a Sorting Algorithm

Course Name: certification course in MIS-DSS

Co-ordinator Name: Asst.Prof. Suradkar D.E Duration : 34hr

Objective of Course:

Provide the knowledge of contemporary issues related to the field of managing information systems, Develop knowledge and skills required to work effectively in a profession, Enhance self-confidence, ability to make proper decisions and effective communication.

		Lectures:
Unit-1	Concept, Definition, Characteristics, Objectives, Role and inn pact of MIS, Management as a control system	(10)
Unit-2	MIS: A support to the management	(2)
Unit-3	Application of MIS, Organization Decision making process, Organizational decision making & MIS and decision making.	(5)
Unit-4	Information: A quality product, IT enabled services, e business, wireless technologies etc	(8)
Unit-5	Information system in business, Computer based 1n formation system, limitation and disadvantages of MIS	(5)
Unit-6	Human as an Information processor, knowledge and knowledge management system, business intelligence	(4)

Reference Book:

- **Management Information Systems by Jawadekar Author(s):** Jawadekar, W. **S.Edition:** 2nd edition **Publisher:** Tata McGraw Hill (TMH)
- **Management Information Systems: Conceptual Foundations, Structure & Development by DavisAuthor(s): Davis, G/ Olson, M.Edition: 2nd edition** Publisher: **Tata McGraw Hill (TMH) Publications India**

Program Outcomes:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

Course Title: Certificate Course in Event Management
Duration: 33 Hrs

Course Description:
The purpose of this course is to enable the students to acquire a general knowledge about the "event management" and to become familiar with management techniques and strategies required for successful planning, promotion, implementation and evaluation of special events with a special focus on case studies of the events.

Expected Student Outcomes:
1. To acquire an understanding of the role and purpose(s) of special events in the organizations.
2. To acquire an understanding of the techniques and strategies required to plan successful special events.
3. To acquire the knowledge and competencies required to promote, implement and conduct special events.
4. To acquire the knowledge and competencies required to assess the quality and success of special events.

About classroom participation:
While the grade cannot be based on attendance *per se*, students should plan to be in class and ready to discuss the readings/ lectures. Students will be divided into small discussion groups at the beginning of the term, and topics for presentation will be assigned to each of group members.

CLASS SCHEDULE

Unit 1: Principles of project/Event Management: From concept to reality **(10)**

Understanding project management - resources - activities - risk management - delegation - project selection - role of the Event Manager.

Preparing a proposal

Conducting market research - establishing viability - capacities - costs and facilities - plans - timescales - contracts.

Clarity - analysis - estimating attendance - media coverage - advertising - budget - special considerations - evaluating success.
